10. Timeline and Milestones

11. Conclusion

1. Organization Overview

1.1 Organization Name

Fresh Harvest Grocery Store

1.2 History of the Organization

Fresh Harvest Grocery Store was established in 2022 to provide fresh fruits, vegetables, groceries, and household products at affordable prices. Since opening, the business has grown steadily and now serves a loyal customer base within the local community. The store is known for its quality products, friendly service, and commitment to supporting local suppliers.

1.3 Mission and Vision

Vision:

To become the leading grocery store in the community by providing convenient shopping, quality products, and an exceptional customer experience — both in-store and online.

Mission:

To provide fresh, high-quality products at affordable prices while delivering excellent customer service and making grocery shopping simple, fast, and enjoyable for every customer.

1.4 Target Audience

- Families doing weekly grocery shopping
- Students looking for affordable essentials
- Working professionals with limited shopping time
- Local community members seeking convenience

- Health-conscious shoppers looking for fresh produce

2. Website Goals and Objectives

2.1 Website Goals

- Promote Fresh Harvest Grocery Store online and build brand awareness.
- Allow customers to browse products and prices at any time.
- Increase sales through online ordering and special promotions.
- Provide essential store information, contact details, and trading hours.
- Make shopping easier and more convenient for customers.

2.2 Key Performance Indicators (KPIs)

KPI	Target
Increase website visitors	+30% within 6 months
Increase online orders	+20% within 6 months
Customer satisfaction score	90% positive feedback
Average session duration	3+ minutes
Mobile traffic share	60% of total visits

3. Current Website Analysis

3.1 Current Status

Fresh Harvest Grocery Store does not currently have a website. Customers rely on social media posts, WhatsApp messages, and word of mouth to get product and pricing information. This limits reach, professionalism, and sales potential.

3.2 Areas for Improvement

- Create a professional, modern website.
- Display products, images, and prices clearly.
- Add an online contact form and enquiry system.
- Make the website fully mobile-friendly.
- Add a shopping cart and simple checkout process.
- Include a search bar for quick product lookup.
- Publish weekly specials and promotions.

4. Proposed Website Features and Functionality

Page	Purpose
Home	Welcome message, featured products, store highlights
About Us	Company history, mission, vision and values
Products	Categorized grocery items with images and prices
Special Offers	Weekly discounts and promotions
Contact Us	Contact form, email, phone, map and trading hours
Shopping Cart	Add, update and remove items before checkout
Search Bar	Quickly find products by name or category

Additional functionality:

- Newsletter sign-up
- Social media links
- WhatsApp order button
- Customer reviews section

5. Design and User Experience

5.1 Color Scheme

Color	Purpose
Green	Freshness, health, nature
White	Cleanliness, simplicity
Orange	Energy, warmth, appetite appeal

5.2 Typography

- Headings: Poppins Bold
- Body text: Arial

Both fonts are simple, legible, and accessible on all devices.

5.3 Layout and Design

- Clean, easy-to-use navigation menu
- Large, high-quality product images
- Clear call-to-action buttons
- Grid-based product layout
- Mobile-friendly and responsive design

5.4 User Experience

- Fast-loading pages (optimized images and code)
- Simple, intuitive navigation
- Short and simple checkout process
- Fully accessible on phones, tablets and computers
- Clear pricing and product information

6. Technical Requirements

6.1 Domain Name

www.freshharvest.co.za

6.2 Web Hosting

- Reliable South African hosting provider
- SSL certificate for secure transactions

- 99.9% uptime guarantee
- Daily backups and email hosting

6.3 Programming Languages

- HTML5 – Structure and content
- CSS3 – Styling, layout and responsiveness
- JavaScript – Interactivity (cart, search, form validation)

Optional tools:

- Font Awesome (icons)
- Google Fonts (Poppins, Arial fallback)

7. Budget

Item	Description	Cost (ZAR)
Domain name	.co.za registration (1 year)	R150
Web hosting	Shared hosting + SSL (1 year)	R1,200
Website design & development	HTML, CSS, JavaScript build	R6,000
Product photography	50 product images	R1,500
Logo design	Custom brand logo	R800
Content writing	Page copy and product descriptions	R1,000
Testing & QA	Cross-browser & mobile testing	R700
Maintenance (monthly)	Updates, backups, support	R350/month
Total (Year 1)		R11,350

10. Timeline and Milestones

Week	Activity	Deliverable
Week 1	Research and planning	Proposal document
Week 2	Design wireframes and sitemap	Wireframes + sitemap
Week 3	Develop website using HTML and CSS	Home, About, Products pages
Week 4	Add JavaScript features	Cart, search, form validation
Week 5	Test the website	Testing report
Week 6	Make improvements	Refined final build
Week 7	Final review and submission	Final submission

11. Conclusion

The Fresh Harvest Grocery Store website will provide a professional online presence, make shopping easier for customers, and increase sales through online browsing and ordering. By combining a clean design, mobile-friendly layout, and essential features like a shopping cart and search bar, the website will strengthen the store's brand and support its long-term growth in the community.
